SKILLS

- FrontEnd
  - React , AngularJs
  - Jquery, VueJs
  - Html, Css, Bootstrap
- BackEnd
  - NodeJs , ExpressJs
  - Python, TypeScript
- Databases
  - Sql , MongoDB, Redis
  - Elastic Search
- Other Technologies
  - AWS, Docker, GitHub
  - Nginx, Linux, Kafka, Jira

EDUCATION

2013 - 2017 (IIIT - RGUKT)
- B.Tech (CSE)
- CGPA: 8.5 / 10

2011 - 2013 (IIIT - RGUKT)
- CLASS XII
- CGPA: 7.5 / 10

2010 - 2011 (ZPH SCHOOL)
- CLASS X
- CGPA: 94%

PROFESSIONAL GAMUT

- **7+ years** of hands-on **experience in Web Development**, Testing, Deployments
- Proficient in developing custom **chatbots** using Node.js (socket.io)
- Successfully **integrated Payment Gateways** to ensure secure and seamless transactions.
- Experience in **creating** and **maintaining** clean and **scalable project** folder structures.
- I have experience **mentoring new joiners** and fellow associates on technology trends and **best practices.**
- Played a key role in **project management** and **problem-solving** efforts across diverse, cross-functional teams.

WORK EXPERIENCE

Ivy Comptech (Systems Analyst)   2022 - PRESENT

- MyGame: (Node.js, ReactJs, Mongo, Big Query, Redis, Docker)

Description: Mygame is a platform designed for poker players, providing comprehensive hand data analysis and statistics for various poker game formats including NLH cash, spins, PLO cash, and MTTs. It offers detailed insights into players' performance, scoring them in different attributes and generating report cards. Additionally, it features a "Whiz Bot" section that evaluates users' gameplay in real-time, providing feedback on their performance after gameplay.

Factset (Software Engineer II)   2020-2022

- CLP(Central Logging Platform): (Node.js, VueJs, MySQL, ELK, Redis)

Description: CLP(Central Logging Platform) is a logging solution that consolidates all application's logs data and pushes it to one central, accessible, and easy-to-use interface. It is used by Factset internal stakeholders to create containers to send their application logs to store and analyze the data. It will be also used to get alerts if the logs satisfy given conditions to ensure there will be no downtime of the applications and also to ensure that there will be no drop logs.

ScriptBees (Sr. Consultant - Software Engineer)   2018 - 2020

- WonderWe (Node.js, Jquery, MySQL, MongoDB, Elasticsearch, Redis)

Description: WonderWe is a crowd funding platform, where it is a source for the needy's to money for innovative ideas and social causes. It is so convenient that the user to just sign up with this crowd funding platform, pitch your story/ idea, leverage power of social media to drive traffic to your campaign, and poof, you could be raise the required funds.

WORK EXPERIENCE

ScriptBees (Sr. Consultant - Software Engineer)

- Spandana : (Angular, Bootstrap, Nodejs, MySql)

Description: Spandana is an online portal for Andhra Pradesh Police to manage complaints. Using this portal, they can create cases and they can assign the case to the particular police station. They can filter the cases based on a police station or dates or petition number and also print the receipt of the complaint. Each case will be forwarded to the police station and once it is solved they finally the case will be closed by CP.

- VolunteerMark: (Jquery, Bootstrap, Nodejs, Mongo, Elastic Search, Redis)

Description: VolunteerMark is an online software application that helps nonprofit organizations and their volunteers maximize the volunteer experience through communication. VolunteerMark is perfect for any organization that oversees volunteer operations including nonprofits, businesses, schools, churches, and civic groups. And the service is, and always will be, free for volunteers.

DBYDX Technologies (FullStack Developer)   2016 - 2018

- Selekt (Angularjs, Nodejs, Django, Jquery, Bootstrap, Elastic search, MongoDB)

Description: "Selekt" is a smart Shopping Assistant that converses with users to help them find the best product that suits their requirements. It guides the user at each step, by recommending relevant products, enlightening the user in all the domains, and features of a specific product, answering complex queries, and understanding user use cases to quickly discover the best in the market within his constraints.
